

Site Council Minutes
Monday May 5th, 2014

OAKS data: We reviewed OAKS data as a team. We noted that there was a significant increase in math scores, which was encouraging with a strong emphasis on math instruction and professional development as a school this year.

The OAKS reading data showed a decline overall in students passing. Some students who did not pass still registered “high growth” which was encouraging to see. We will continue to discuss ways in which to boost reading achievement into the 14-15 school year.
