

Site Council Minutes
January 13, 2014

Carlynn reviewed her OAKS testing plan which she found success with at her former school. It divides students into 3 groups based on their likelihood to pass and their need for support. Students in the A group who are highly likely to pass and not need support will test first, and in larger groups. Students in the B group will test in somewhat smaller groups, and students in the C groups will be tested last (thus having more instructional opportunities before testing time). The schedule was reviewed for feasibility.
